PURPOSE

Alzheimer's disease and dementia are conditions that advance over time, with medications available but no cure. Of the nearly 6 million Americans living with Alzheimer's disease, 80% reside in their homes relying on family caregivers. For November as National Family Caregivers Month, this workshop recognizes the impact on caregivers' mental health and well-being in addition to addressing these questions:

Do you know the major warning signs of dementia, the disease progression, and current treatments available? Do you know what resources exist for caregivers? If you are unsure of how to answer these questions, join us to learn more about the complexities of Alzheimer's and other dementia-related conditions.

**This workshop takes place on Zoom.
A link and any handouts will be emailed
the day before the workshop.**
