## Purpose:

Unconscious bias is **automatic, unintentional stereotypes** and **judgments** that we hold as humans and can cause us to act unfairly toward others. These judgments can be **positive** or **negative** based on age, race, gender, sexuality, ethnicity and more.

As helping professionals play a vital role in supporting diverse communities, it is essential to **recognize and address unconscious bias** to **provide equitable and effective care**. This workshop is designed to enhance awareness and skills of helping professionals in understanding and mitigating unconscious bias while fostering a culture of inclusivity and respect in working with not only older adults, but everyone we interact with.

## Presenter:
