SESSION HIGHLIGHTS

LGBT Aging: The Journey Toward the Future of Culturally Competent Care

Monday at 1:15 p.m.

Jerry Mallicoat, Rainbow Elder Care and Public Health — Dayton and Montgomery County

In this session, participants will gain an overview of LGBT aging — how the minority stress model explains health disparities and how to address them through cultural competence, humility and organizational readiness to serve older LGBT adults.

Hospice Care for LGBT Individuals and Families

Monday at 3:00 p.m.

Michael Kammer, Ohio's Hospice

The issues and dynamics LGBT individuals face in society and with family evolve over time — often in resolution but sometimes in continued tension, conflict or estrangement. When facing death, unresolved issues return to the forefront. Families often come together at this time, but what can be a sacred time of saying good-bye can become a time of conflict.

This session will explore how patients, families and the hospice team can navigate this journey together.

Challenges Facing LGBT Older Adults with Dementia: Risk and Needed Strategies

Tuesday at 2:45 p.m.

Dr. Jason Flatt, UCSF School of Nursing Institute for Health and Aging

This session will focus on dementia in LGBT older adults and what is known about potential modifiable risks and protective factors. This presentation will include a brief overview of existing research on LGBT older adults as well as potential risk and related health challenges. Dr. Flatt will also provide recommendations for future research, policy and community-based programs and services.

TUESDAY, FEB. 12
