

CONCERNED ABOUT ENERGY PRICES?

LEARN HOW TO MAKE WISE ENERGY CHOICES

Energy Choice allows eligible consumers to choose their electric and/or natural gas from a certified energy supplier.

For many years, the utility's Standard Offer has been the best way to save money for the supply of electricity or natural gas. However, with the current energy market, it may be a good time to consider Energy Choice.

SAVINGS ARE NOT GUARANTEED!

Consumers MUST do their homework to avoid paying more.

Before contracting with a marketer or an aggregator, consumers should compare their rate to other market offers and the *Standard Choice Offer* for natural gas and/or the "*Price to Compare*" for electric. Consumers should review options monthly to confirm they are STILL saving money. Consumers should read all contract terms (length of the contract, teaser rates, early termination fees, etc.) before signing.
